

8-2-1-1: LAWN SPRINKLER AND IRRIGATION SYSTEMS:

A. Permit Required; Installation Requirements: All lawn sprinkler systems and irrigation systems connected to the Municipal water system, whether such systems are aboveground or underground, shall require a permit for connection and shall be installed in accordance with the provisions of this section and section 9-1-1 of this Code.

B. Rain Detection Device Required: All lawn sprinkler systems and irrigation systems which are automatic or are equipped to operate automatically and which are connected to the Municipal water system shall be equipped with a rain detection device so as to prevent the system from operating during times of precipitation.

C. Any irrigation system installed within a townhouse base lot, multiple family lot, commercial lot, industrial lot, or institutional lot shall utilize a separate meter from the water service connection. (Prior Code § 6-2-6; amd. Ord. 2019-25, 11-25-2019)
